No.366 SD/53-2 dated 10th August 1953.

Sir,

Ports - Mangalore - Electrification of south wharf and dock area.

I have to state that the electrification of the south wharf dock area at the port of Mangalore is proposed to be taken up this year and a provision of Rs.15,000/- therefor has also been made in the current year's budget estimate of the Mangalore Landing and Shipping Fund. It is considered desirable that the above work is taken up as urgently as possible - vide copy of the Port Officer's letter No.1662/52-3 dated 4-8-53 enclosed. In the circumstances reported by the Port Officer, necessary estimate for the work will be prepared by this department taking advice and particulars from the local officers of the Government Electricity Department, if found necessary.

I request early orders of Government.

Yours faithfully,

State Port Officer.

AT/11.

P.T.O.

No.1662/53-3 dated 4-8-53.

Ports - Mangalore - Lighting dry dock area and south wharf - State Port Officer's Memo No.366 SD/53-1 dated 17-7-53.

--

The lighting of the port area in a port of this importance has been a long felt need. Several vessels discharge and load cargo at night and specially on steamer days, loading and unloading take place invariably throughout night. Providing lights will not only facilitate speedy loading and unloadings but also avert risk or injuries to mazdoors while working thereon between ship and wharves. Thus lighting is considered to be the most important one amongst all the amenities that the Port Department is expected to provide to the mercantile community and the vessel owners transacting at the port and paying loading and shipping fees on the cargo landed and shipped at the port.

The question of conversion of the port into a Trust is on the anvil and proposals to enclose the port area gradually have also been taken up.

In the circumstances, I am of the opinion that the lighting of the port area as proposed should be taken up expeditiously so that if possible the port area may be lit up when the next busy season commences about the middle of September next. I therefore request that the Government may please be requested not to delay the sanction of work.
